SYNERGETIC
MEDICAL-ESTHETIC
METHOD

STRENGTHENS THE
BALANCE
FROM WITHIN

SYMMED is a unique treatment that combats medical-cosmetic disorders and stimulates the natural functions of tissues, helping to restore the skin's natural balance and elasticity, reducing grease and oxygenating the skin for correct microcirculation.

TERMO SALUD

SYMMED boosts the effects of diathermy treatments using radiofrequency, virtual mesotherapy and **FUNCTIONAL COSMETICS**, resulting in the most advanced and effective, painless and non-invasive cosmetic technology, that offers the best results for facial and body treatments.

BODY treatment

- REMODELLING
- CELLULITE
- FIRMING
- POSTPARTUM TREATMENT
- DRAINING
- MUSCLE RELAXATION

FACIAL treatment

- LIFTING EFFECT
- FACIAL CONTOUR
- WRINKLES AND FLACCID SKIN
- PUFFS AND DARK CIRCLES

TERMO SALUD

SYMMED is an innovative working method that combines the most advanced and efficient medical-esthetic technology with a specific treatment and a cosmetic line designed to boost the skin rejuvenation.

MULTIPLE EFFECTS, ALL THE BENEFITS

: molecular or ionic effect.

: biostimulating effect.

: draining effect

- **LIPOLYTIC EFFECT:** aids and increases the breakdown of fats in adipose tissue.
- **FIRMING EFFECT,** thanks to the contraction, stimulation and recovery of the structure of collagen fibres.
- **ANTI-AGEING EFFECT:** accelerates cell mitosis and leads to the regeneration of collagen. It also develops cell renewal thereby improving the tissues.
- **SOOTHING EFFECT** on nerve endings: the muscle fibres relax and this then reduces tension.
- **DRAINING EFFECT,** through the hyperactivation of the metabolism.
